GAOTek E1 Tester

1. Product Start Guide:

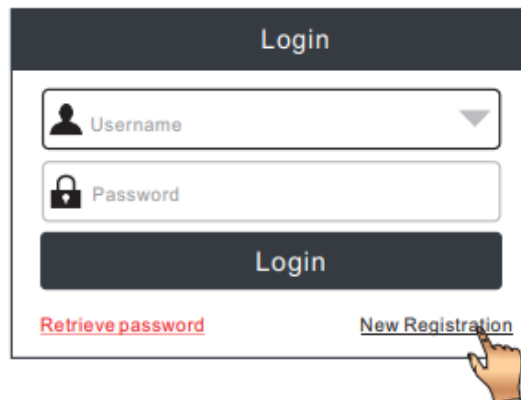

2. WLAN Setup:

- Press the [POWER] key on the display tablet to turn it on.
- Tap Settings on the home screen and then WLAN to configure the Wi-Fi setting.
- Select the desired Wi-Fi connection from the list. (Password may be required for secured networks).
- When connected appears, it indicates that it is properly connected to the network

3. Register and Download Software:

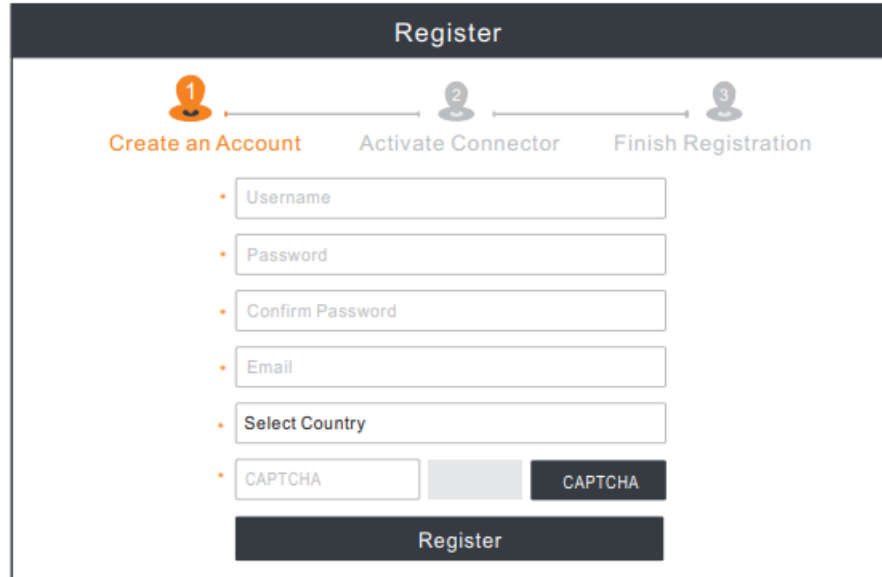

1. Launch app:

Tap on the application icon on the home screen, and then tap on **Login** on the upper right corner of the screen. The following screen will appear.

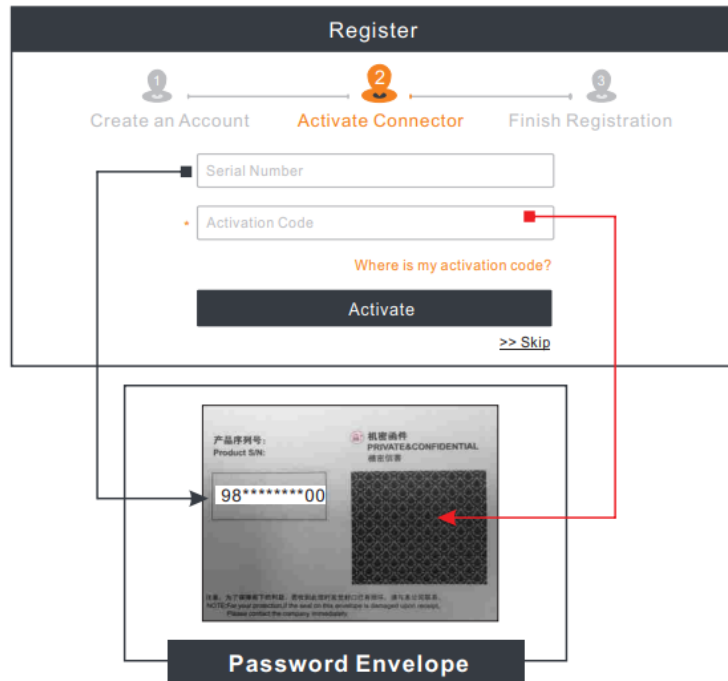

2. Create an App Account:

Tap on **New Registration**, input the information (items with * must be filled) and then tap on **Register**.

3. Activate VCI:

Input the Product S/N and Activation Code (can be obtained from the password envelope), and then tap on **Activate**.

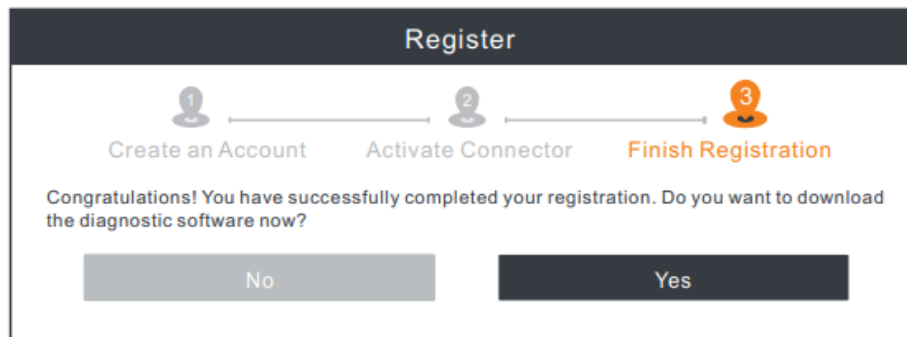

4. Finish Registration:

Tap on **Yes** to enter the vehicle software download screen. Tap on **Update** on the update page to start downloading.

Once downloading finished, the software packages will be installed automatically.

Note: When downloading the diagnostic software or checking for updates it is important to make sure the tool has a strong Wi-Fi connection.

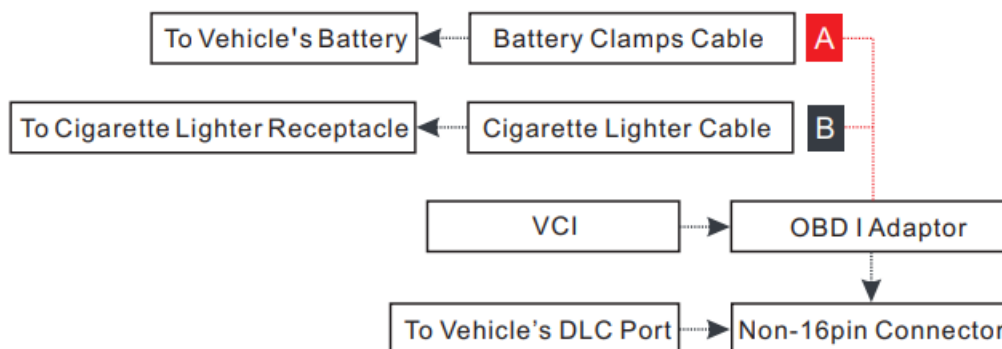

4. Vehicle Connection:

4.1: For Passenger Car Option:

1. OBD II Vehicle Connection

Directly plug the VCI into vehicle's DLC port or use the OBD II extension cable to connect the VCI to the vehicle's DLC port.

2. Non-OBD II Vehicle Connection

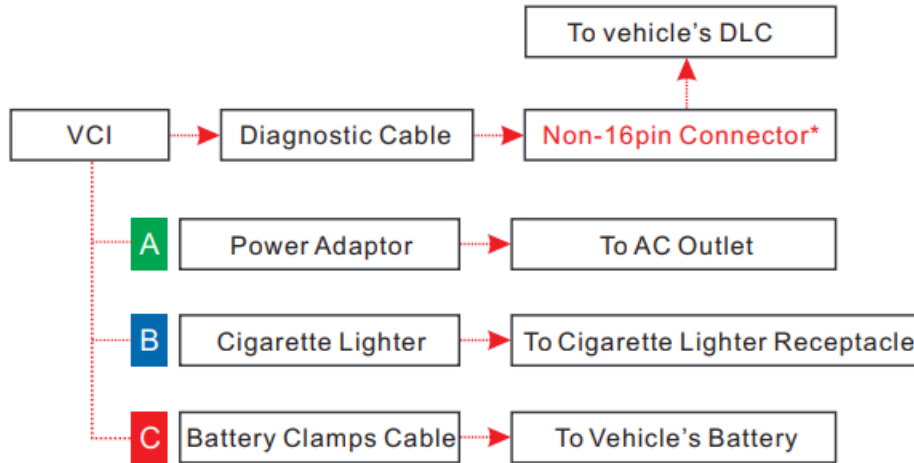

4.2: For Commercial Vehicle Edition/Diesel & Gas Vehicle Edition:

1. OBD II Vehicle Connection

Use the diagnostic cable to connect the VCI device to the vehicle's DLC port.

2. Non-OBD II Vehicle Connection

5. Start Diagnostics:

Preparation

- The ignition is turned on.
- The vehicle battery voltage is 9-14 volts or 18~30 volts.
- The throttle is in the closed position.

Three diagnostic methods are available:

- **Intelligent Diagnostics:**

The system will automatically guide you directly to the fix and help you eliminate guesswork, without step-by-step manual menu selection.

- **Local Diagnostics:**

You need to manually select the menu-driven command.

- **Remote Diagnostics:**

This helps repair shops or mechanics to diagnose a remote vehicle, and launch instant messages, allowing for improved efficiency and faster repairs.

For new users, the Local Diagnostics is recommended as follows:
