GAOTek OTDR Launch Cable

Introduction

The OTDR Launch Cable is similar to the fiber optic patch cord. There is no fusion splice in the middle of the fiber. It is generally placed in a box, which is small, light, and easy to carry. In the optical fiber testing process, the OTDR launch cable is mainly used to make up for the OTDR test blind area.

Product Features

- There is no fusion joint in the middle of optical fiber.
- Small size, light weight and easy to carry.
- Fiber length and connector can be customized.

Technical Indicators

Connector type	FC/LC/SC/ST/E2000
